Thanks for this Rob, and for the list of contacts you sent through earlier.

That's useful information for guess-timating the size of the application from this end.

Regards,
Martin

Subject: Re: APZ Evolution Transition call - minutes

All,

My second action from our meeting the other day was to provide the source code count. Below you will find the current lines of code count for the PLD (policy admin) part of the project. Please note that this does not include Work Manager, which will be provided early next week.

Back-End Java Code

[REDACTED]

Front-End .NET

[REDACTED]

Regards,

Hi all,

Please find attached minutes and actions from this morning's/evening's call (APZ-EVO-TransitionProject-Mtg-20151111.doc).

Also attached is the updated questions document (Evolution-Transition-Questions_v0.4.docx). Please note, I've added one further question to the end of that table about test preparation (highlighted yellow).

Please let me know if I've missed or misrepresented anything important.

Kind regards,

Hi Rob,

Per Martin's request below, can he get what he needs around Work Manager from your team, rather than Alex and Lei?

Dejan should be able to give them the run down on Blaze, and however we are providing the documents for the Australia NB component should be the same way that we provide the Work Manager documentation.

It should be a point in time - we are not going to continuously provide code and solutions as we iterate after this point (same agreement as for Australia NB).

Let me know if you have any questions.

Thanks,

Hi Zorica,
Are you OK if we provide the code/scripts/Release documents as per Martin's

list below, and also let them meet with Lei regarding Blaze?
I told Martin it all requires your approval.

Thanks,

Subject: Work Manager artefacts

Hi Alex,

Thanks for your time today.

As discussed, could you provide us the following Work Manager artefacts:
Source code for current Work Manager release in production (front end & back end)
Database create script for the Work Manager database (dev instance only).
Insert statements for reference data tables
DWS and Chubb APZ have no requirement to see any data such as client information. We just need the data required for the application to function
Any documentation you might have on building, deploying and configuring the application

Also, could we please arrange a session with Lei Lam and our developers next week to go through the use of Blaze in Work Manager? Monday afternoon or anytime Tuesday would be great.

Many thanks & have a good weekend.
Martin

Agreed. My understanding is that it was placed on a share in the Chubb Network.
Dave apparently has VPN access.

When I found out yesterday I told the team to remove any files from the share.

This was apparently shared on Thursday and taken down yesterday.

But how could they 'provide' it? We need to make sure we have
security/servers/environment in place? We shouldn't be emailing/putting it on
sticks etc. - that's not secure.

Can you please get me this answer asap? I have an updated call on Monday eve
with Russ et al, so I need to address it there.

Subject: Re: Work Manager artefacts

Hi Zorica,

Ok make sense re the docs.

I checked with the team today and apparently David asked to see the PLD code - they did provide it as part of the walkthrough this week.

I've asked them not to provide anything else - sounds like the best process will be any additional transfer of code will be handled by Chubb.

I'll try to find out exactly what was provided on Monday.

On Nov 28, 2015, at 11:46 AM, ztdorovic@chubb.com wrote:

Hi Rob,

We can provide the documents - I meant that we should put them in SharePoint so they are with the same group of PLD documents.

Also, for the code itself, we are not 'giving' them the code right now, but just will copy it to the new Infrastructure once it's up - that's the process that's been agreed, correct?

Thanks,

Zorica Todorovic

Hi Zorica,

We're happy to help as best we can. In fact we've already offered to assist in any clarifications on the work manager stuff. Dejan, Allan, and Cecil can answer questions/share what they know next week.

I'm not sure I understand your point about WM documentation though. I can check to see what the team has, but I can't promise it is in the same format and status of PLD. I also can't promise that what we have is current.

Since the AC team has been out of the WM project for over a year, there may be major gaps in our understanding vs. what's been implemented.

Thanks,
Rob
